|                                   |                                      | ♦ Basic knowledge of virtualization      |

## Professional Experience & Employment History

### EMERGENCY COMMUNICATIONS NETWORK (ECN) – DEVOPS TECH / CONFIGURATION MANAGEMENT – MAY2015 TO PRESENT

- ♦ Managed code repository resulting in correct versioning of projects, accountability and integrity of code.
- ♦ Implemented and managed TeamCity (continuous integration) and Octopus Deploy (automated deployment) that lead to the elimination of manual deployments and a confident deployment and build process.
- ♦ Created IIS websites and configured app pools for different environments.
- ♦ Taught and instructed new users on SVN best practices and procedures leading to correct development use.
- ♦ Troubleshooted and fixed coding, SQL, and configuration issues in different environments to keep builds and projects on schedule.
- ♦ Maintained project configuration files and settings to ensure consistent deployments.
- ♦ Created processes and documentation for traceability of various errors, tasks, and SOP's.
- ♦ Managed integrity of Development, Staging, and production environments.
- ♦ Wrote PowerShell scripts to assist with daily redundant tasks saving time and effort of staff.
- ♦ Utilize DNS management tools to roll sites manually and insert DNS entries for websites.
- ♦ Assisted with change control by providing feedback of risks associated with sudden change with builds or environments.
- ♦ Wrote Subversion policies and procedures to create uniform CM.
- ♦ Used Octopus Deploy to manage configuration files for applications.

### FLETCHER'S MANAGEMENT SOLUTIONS – NETWORK TECH – OCT 2013 TO MAY 5015

- ♦ Troubleshooted and documented issues pertaining to all network issues
- ♦ Organized undocumented networks gathering information on IP addresses, user workstations, active servers, and any network nodes.
- ♦ Conduct basic cabling in and out of server rooms.
- ♦ Plan and implemented upgrades for companies including but not limited to: new servers, installation of domains, DHCP setups, Microsoft Exchange upgrades, workstation upgrades, application licensing, network monitoring systems.
- ♦ Utilize network monitoring system to troubleshoot issues in networks.

# Jayson Ryter

- ◆ Perform malware cleanup for end-users.
- ◆ Identified points of failures in networks and provided solutions or recommendations.
- ◆ Configured Cloud backup for clients ensuring safe data and reliable data retrieval.
- ◆ Worked with various vendors implementing new technologies and equipment.

## **MARINE CORPS - MOTOR TRANSPORT OPERATOR / SAFETY SPECIALISTS / MANAGEMENT – AUGUST 2008 TO AUGUST 2012**

- ◆ Safely and effectively operated vehicles in accordance with Marine Corps regulations and standards
- ◆ Timely and efficiently delivered cargo and or personnel in a safe professional manner
